## Experience

**ASP Integra Opciones | Web Designer**

August 2023 - November 2023

> Redesigned and implemented the website for a fintech subsidiary, enhancing usability and aligning with the brand's identity.
> Led the design process from research and planning to wireframing, prototyping, and front-end implementation using UX/UI best practices.
> Improved usability and visual consistency; aligned with corporate branding guidelines.

**Academic Department of Computer Systems | Front-End Developer**

June 2022 - April 2023

> Initially joined as a front-end developer, later expanded my role to include UX/UI design responsibilities to meet project needs.
> Redesigned internal applications with Figma, establishing visual guidelines to ensure a consistent user experience.
> Contributed to improved usability and interface consistency in internal platforms.
